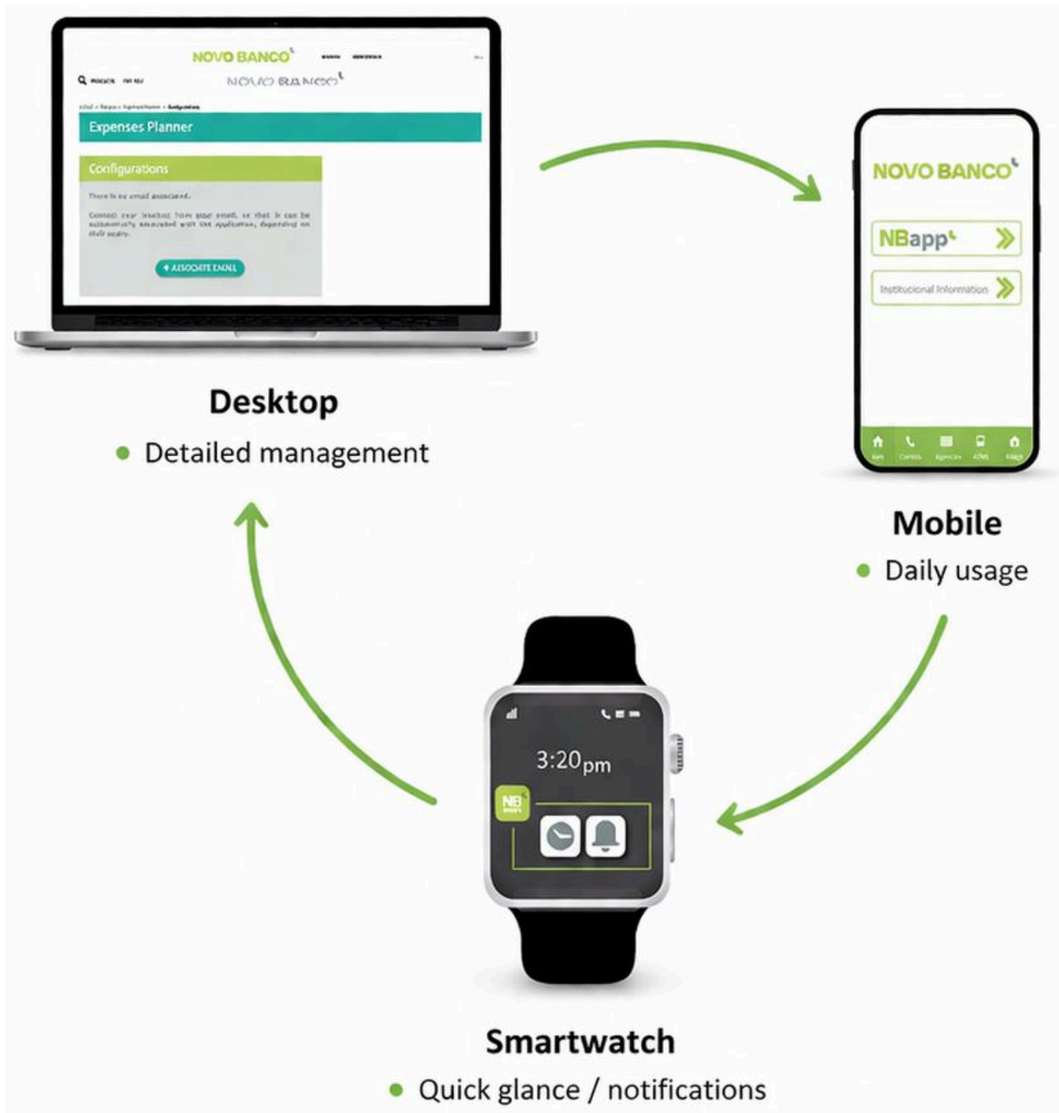
A Digital Service in the Physical World

UX Case Study

App Concept



My Role

Co-developed the concept and design, led low-fidelity prototyping, and co-developed to high-fidelity interface design across multiple devices

Cross-Platform Design · UX Strategy · Interaction Design

Context / Challenge

Traditional banking applications fail to meet the expectations of younger generations, who seek simple, fast, and intuitive digital experiences - complex interfaces, lack of clarity, and inefficient access to financial information across different devices.

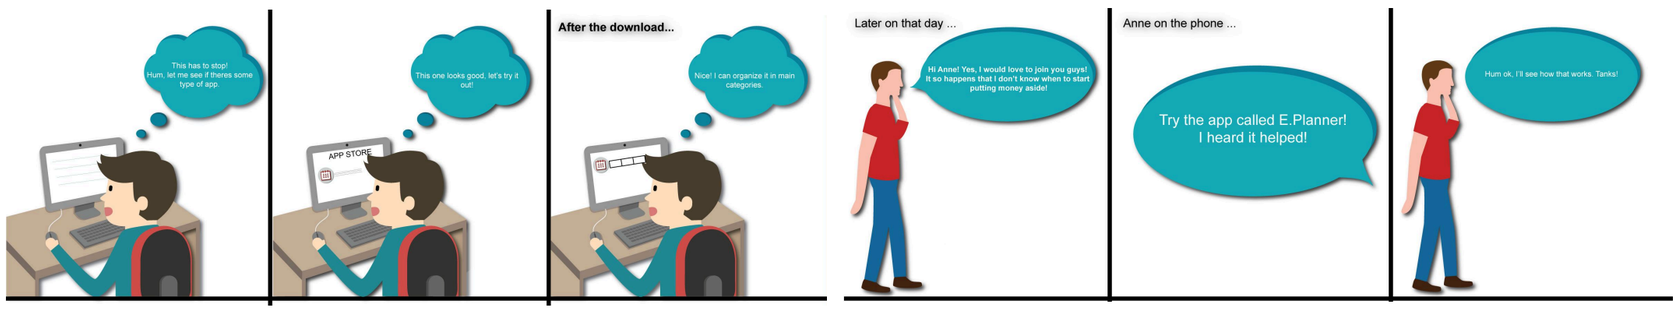
Design Approach

Before (Problem)

Frustration / problem

Seeking a solution

Confusion / difficulty



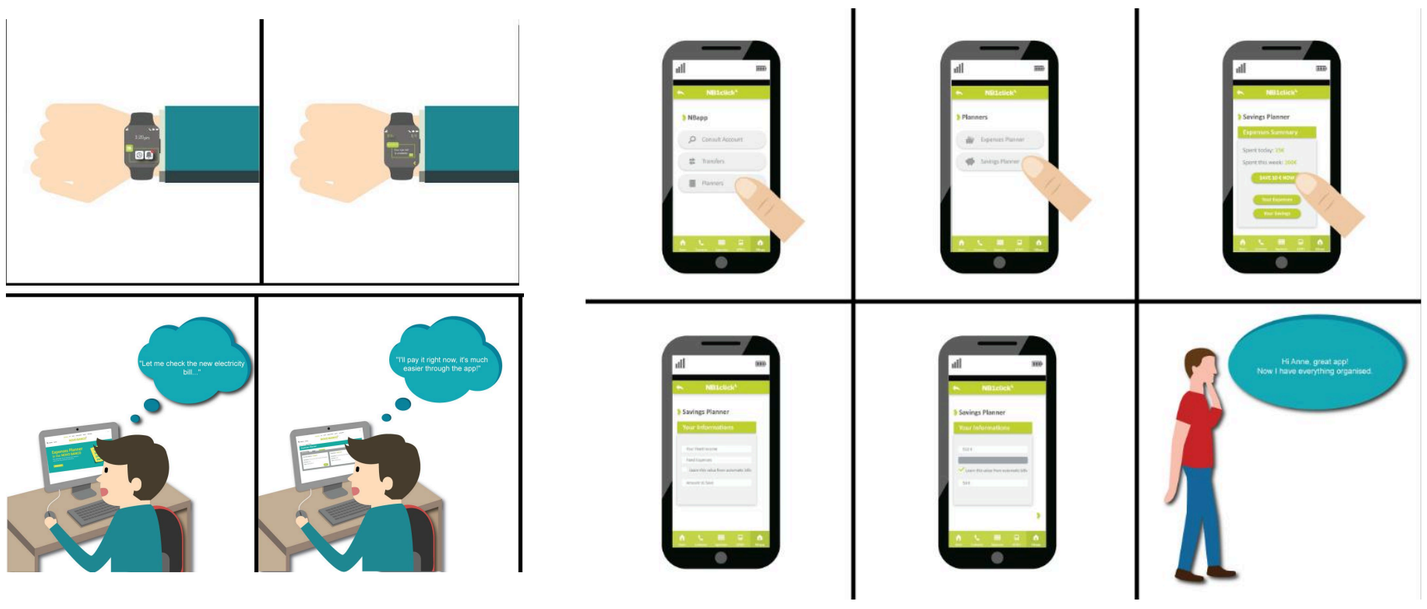
After (Solution)

Discover app

Use mobile

Use a smartwatch

Positive result



Project Duration

6 weeks

45+ screens
